Your Net Promoter Score (NPS)

1. How likely are you to recommend AXXESS to a colleague, organization or professional contact?

Overview

Promoters make up the majority, while neutrals and critics are relatively few, which is a relatively healthy data structure. You can pay attention to the reasons for user criticism and optimize accordingly.

3. Which three features currently provide the most value?

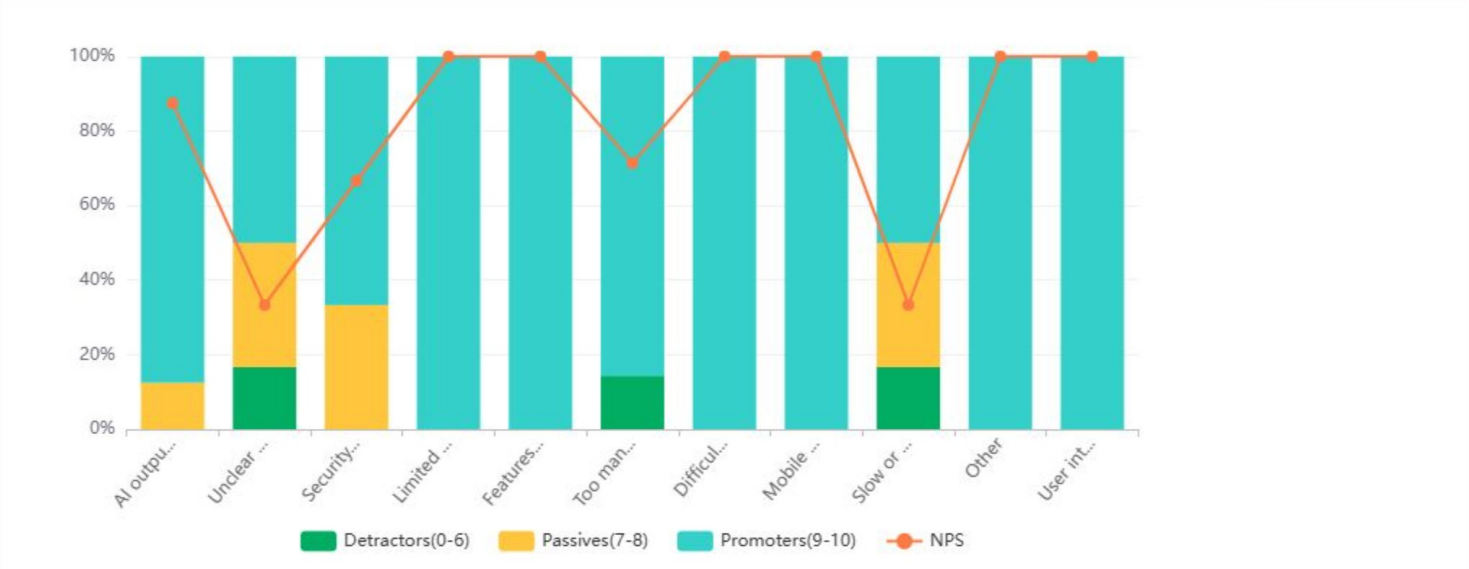

Answer Choices	Responses	Promoters(%)	Passives(%)	Detractors(%)	NPS
Enterprise workflow and task management	12	100	0	0	100
Gmail/Microsoft integrations	3	100	0	0	100
Policy controls and governance	7	100	0	0	100
Audit trails and workflow evidence	1	100	0	0	100

Overview

"Enterprise workflow and task management", "Gmail/Microsoft integrations", "Policy controls and governance", "Audit trails and workflow evidence" has more supporters and is considered an advantageous direction that can be steadily consolidated, while "Documents, knowledge and RAG" has relatively few supporters and falls into the category of areas that can be optimized. If you intend to expand your market, starting with "Documents, knowledge and RAG" is a good idea.

4. Which three issues most reduce the product’s usefulness today?

Answer Choices	Responses	Promoters(%)	Passives(%)	Detractors(%)	NPS
AI output quality	8	87.5	12.5	0	87.5
